SOFTWARE DEVELOPER

Results-driven software engineer with 3+ years of experience in building scalable web applications, CI/CD pipelines, and ML systems. Proven track record in backend and DevOps engineering, driving business impact through clean architecture, automation, and SEO optimization. Strong communicator, team player, and lifelong learner.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, Shell Scripting
- **Web Development:** React, Next.js, Node.js, Flask, Bootstrap, REST APIs, NGINX
- **Cloud & DevOps:** AWS, Docker, GitHub Actions, GitLab CI/CD, Ansible
- **Databases:** SQL (PostgreSQL, SQLite, DuckDB), NoSQL (MongoDB, Redis)
- **Machine Learning & AI:** PyTorch, TensorFlow, Scikit-learn, Deep Learning, Reinforcement Learning

EXPERIENCE

Backend Engineer | Florida State University [USA] [Dec 2025]

- Legacy System Modernization: Modernized a legacy application by refactoring **PHP** backend logic and migrating jQuery-based frontend components to Vanilla **JavaScript**, resulting in a cleaner architecture with improved performance, maintainability, and long-term scalability.

Data Analyst | Goodwill Bigbend Industries [USA] [April 2025- Nov 2025]

- Built production-ready ETL pipelines with **DLT Hub**, **DuckDB**, and **Dagster** to ingest API data into a data warehouse.
- Optimized data fetching and transformation processes, reducing pipeline runtime by **40%**.
- Built end-to-end donor report generation pipeline from scratch using **Pandas**, **Python**, and **Matplotlib**, improving efficiency by **75%**.

Software developer & SEO Engineer | Pro Playgrounds [USA] [May 2023 - April 2025]

- Built and deployed an **AI-powered keyword filtering system** that enhanced SEO strategy, improving search rankings and driving a **\$5M+ revenue increase**.
- Led marketing and development teams to launch an SEO-optimized gallery with MySQL and Google Analytics, boosting organic **traffic by 28%**.
- Led front-end development of **modular, responsive UI components**, improving UX and increasing **organic traffic by 37%**.

Full Stack Developer | [meabhi.me](#) [Self-Employed] [Jan 2024 - Present]

- Designed and implemented a hash-based, two-user chat system with a **Go (Golang)** backend, building a fully production-ready server to handle authentication, user management, chat rooms, and real-time messaging.
- **Modular Refactor:** Refactored a monolithic codebase into a **modular, maintainable architecture** using NestJS & Next.js, improving deployment consistency and code readability.
- **Tiny Url Generator** : Created a TinyURL microservice with Flask and Redis, incorporating collision detection and boosting link query performance by **25%**.
- **Portfolio Website** :Deployed a scalable portfolio site with **CI/CD on AWS EC2**, orchestrated using Flask, MongoDB, NGINX, Ansible, and React; achieved **99.9% uptime**.

Software developer and DevOps | Cognitive Geo Interpretation Inc - [USA] [Jan 2022 – Dec 2022]

- Developed and designed provisioning pipeline of EC2 instances for microservices using **Ansible and GitLab CI/CD**, reducing setup time by **65%** and improving deployment velocity.
- Enhanced code reliability by increasing unit test coverage from **63% to 78%** using Pytest.

Research Assistant | Florida State University - [USA] [Feb 2023 - July 2023 ; Apr 2021 - Dec 2021]

- Built and trained **Federated Learning models (FedAvg)** on MNIST dataset using PyTorch, achieving **94% test accuracy** across distributed nodes.
- Implemented **Double Deep Q-Learning** models to optimize task offloading in edge computing environments, yielding **30% improvement in latency**.

PROJECTS

Open-Source Patching and Un-patching tool

- Developed "**Patching**," an open-source tool for **image segmentation** and recombination using patch-based techniques.
- Designed "**Unpatching**" to reverse transformations with interpolated tensor merging, enhancing usability for ML researchers.

Pytorch Image Style Transfer

- Implemented the style transfer algorithm based on the "**Image Style Transfer using CNNs**" paper using PyTorch and **VGG19**.
- Extracted multi-layer **content and style features** to generate target images with artistic transformations.

EDUCATION

- **M.S in Computer Science** | Florida State University [Jan 2021- Apr 2023]
- **B.E in Computer Science** | Bhilai Institute of Technology [May 2014 - Jun 2019]
